Better Cooking. Better Living.

A Cooking Specialist Since 1978

A Cooking Specialist Since 1978

A kitchen is not just a functional space. It is a place where daily routines turn into rituals and where people spend more time than they plan. Although ingredients and habits vary across countries and cultures, the reason is always the same: cooking is a way people engage with life.

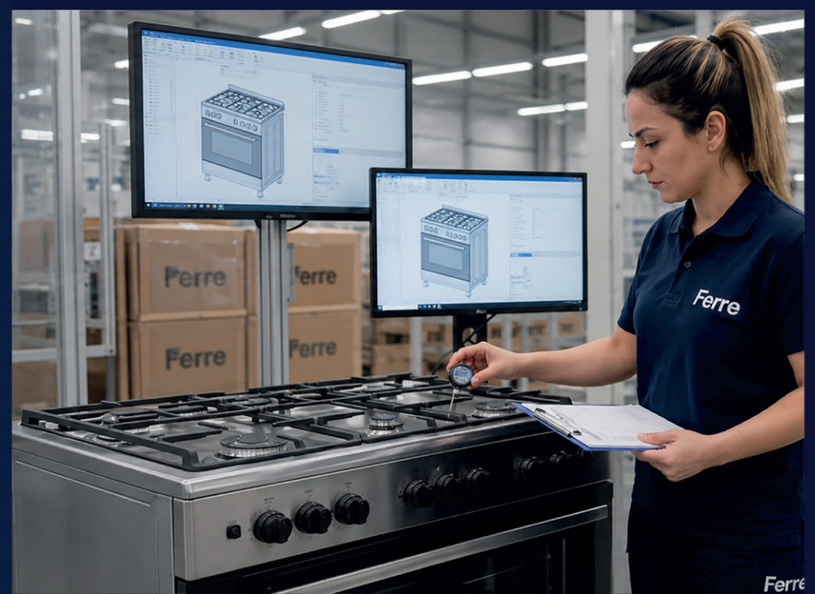

Since 1978, Ferre has focused on a single field: cooking. It has deepened its expertise in ovens, hobs, and hoods; learning from real kitchen experiences and transforming this knowledge into disciplined engineering.

Each product is designed to feel intuitive in daily use and to deliver consistent performance. Because trust is built not by promises, but by experience.

Better Cooking, Better Living.

Quality Testing & Compliance Mindset

Quality is not just a claim; it is a discipline practiced every day.

At Ferre, quality starts before production, shaped by engineering, material, and process decisions, and continues through testing and in-process controls. The goal is not only to detect issues, but to prevent them at the source.

This approach ensures reliable, predictable, and sustainable products. It also supports compliance across different markets, enabling smooth and repeatable OEM/ODM operations.

Global Readiness

Different regions require different needs and standards. A truly global manufacturer delivers consistency across these differences.

With a presence in more than 140 countries, Ferre has developed a strong operational infrastructure that adapts to the technical, legal, and commercial requirements of different markets.

Our systems are designed to integrate seamlessly with certification, safety, documentation, and labeling processes.

Our strong and continuously evolving distributor network ensures stability, after sales continuity, and local market expertise. As a result, products are not only delivered, but supported throughout their lifecycle.

Brands working with Ferre gain access to markets that are already operationally and commercially structured.

Ferre simplifies technical variations and regulatory requirements, enabling partners to focus on building their brands.

By ensuring quality, manufacturability, and compliance, Ferre enables brands to grow globally with consistency, reliability, and long term sustainability.

Special Enamel Coating
Precision in Every Layer
Where Technology Meets Perfection
Six Axis Robotic Enamel Application
Electrostatic powder enamel is applied with robotic precision, ensuring uniform thickness across every surface, edge, and corner.
Flawless Smooth Interior
The perfectly coated surface enhances both durability and aesthetic refinement.
Effortless Maintenance
Its non-porous structure resists grease and residue, allowing easy cleaning and long lasting hygiene.

Double Fans & Double Ring Heaters
Delivers Heat from Every Angle
Where Airflow Meets Perfection
Double-Fan Circulation
Ensures even heat distribution on every level.
Double Ring Heating
Delivers balanced, multi-directional heat with no hot spots.
Perfectly Even Results
Consistent airflow guarantees flawless cooking every time.

Freestanding Cookers Key Features

Strong Cooling System
Controlled Power
Performance Without Compromise
Advanced Thermal Management
The optimized cooling system protects surrounding cabinetry while maintaining safe exterior temperatures.
Stable Interior Climate
Internal heat balance remains undisturbed, preserving cooking consistency and energy efficiency.
Safety in Every Detail
Designed to perform powerfully engineered to protect.

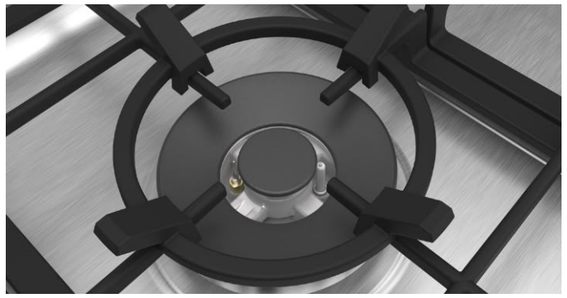

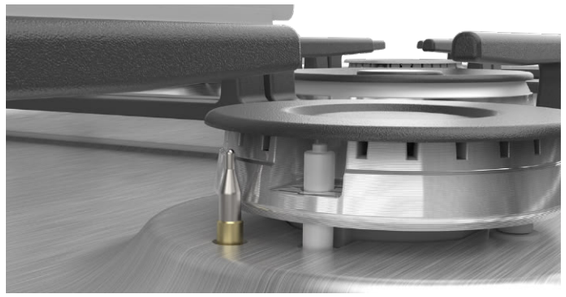

Professional Quality Rotisserie
Master Rotating Perfection
Where Capacity Meets Precision
Full-Size Oven Capacity
Spacious interior allows you to roast multiple portions at the same time with optimal spacing and balance.
Even 360° Rotation
Continuous rotation ensures uniform browning, juicy texture and tender results on every side.
Consistent Professional Results
Delivers perfectly roasted meats with crisp exteriors and succulent interiors every time.

Burner
Thanks to its high-performance burner system, the oven reaches the ideal cooking temperature in a short time, helping save time in the kitchen.

Burner Caps
Professional-grade burner system delivers balanced and high-performance cooking.

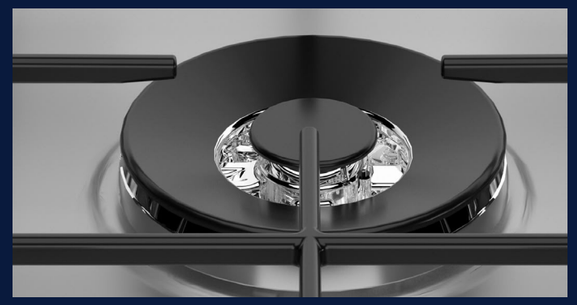

Gas Safety System
If the flame goes out for any reason, the gas flow is automatically cut off, ensuring safer use.

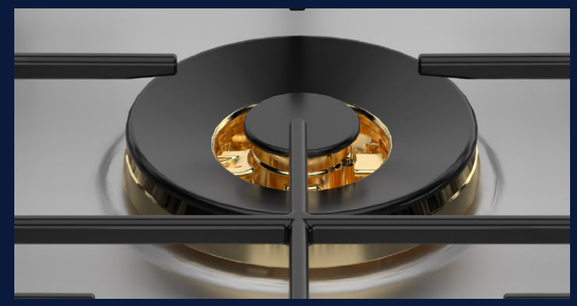

Shut Off Mechanism
The shut off mechanism automatically stops gas flow when needed, helping prevent gas leakage and providing safer, more controlled use.

DEFROST
The fan circulates the air around the meal and defrost the frozen food such as meat, bread and cake.

BOTTOM HEATER
Only Lower heating is turned on. If the bottom of the meal, which is being cooked, needs to be fried, use the programme towards the end of the cooking. Also use this function for Steam Cleaning.

TOP&BOTTOM HEATER
The food are heated in the same way downwards and upwards.
Upper and Lower heating are turned on. It is convenient for the food such as cakes, pastries.

TOP HEATER
Only Upper heating is turned on. If the top of the meal,
which is being cooked, needs to be fried, use the programme towards the end of the cooking.

TOP&BOTTOM with FAN
Lower + Upper Heating and Fan are turned on. It is convenient for the food such as meat, cakes, biscuits. By the help of fan, the air circulation is performed in a controlled way and evenly within the oven.

TOP HEATER with FAN
Only Upper heating is turned on. If the top of the meal,which is being cooked, needs to be fried, use the programme towards the end of the cooking.

FUNCTION OPTIONS Symbol&Descriptions

HIGH GRILL HEATER
It is convenient for grilling and frying big and medium portion meals.
It heats the whole area under the heater.

FLOW ART
The grill and fan operates together. The fan distributes the hot air evenly. It is convenient for cooking large sized meat dishes.

LOW GRILL HEATER
The food are heated in the same way downwards and upwards.
Upper and Lower heating are turned on. It is convenient for the food such as cakes, pastries.

TURBO HEATER with FAN
Turbo heater shall step in and cook your meal evenly with hot air by the help of fan.

LARGE GRILL
Suitable for grilling large and medium cuts of meat, and browning sliced bread. The entire area under the heating element is heated.
