Better Cooking. Better Living.

A Cooking Specialist Since 1978

A Cooking Specialist Since 1978

A kitchen is not just a functional space. It is a place where daily routines turn into rituals and where people spend more time than they plan. Although ingredients and habits vary across countries and cultures, the reason is always the same: cooking is a way people engage with life.

Since 1978, Ferre has focused on a single field: cooking. It has deepened its expertise in ovens, hobs, and hoods; learning from real kitchen experiences and transforming this knowledge into disciplined engineering.

Each product is designed to feel intuitive in daily use and to deliver consistent performance. Because trust is built not by promises, but by experience.

Better Cooking, Better Living.

Engineering & R&D That Listens

Innovation matters only when it becomes usable. At Ferre, R&D is a bridge between real kitchen experience and measurable engineering. Our process starts with observation;
we analyze user needs and translate these insights into testable solutions.

Ideas are refined through validation, endurance testing, and continuous improvement. Because repeatability is what makes innovation real in mass production.

Our technologies deliver everyday comfort through easier cleaning, controlled heat, smarter air flow, low noise levels,
and intuitive use.

Each solution is developed to provide a tangible benefit to the user.

Global Readiness

Different regions require different needs and standards. A truly global manufacturer delivers consistency across these differences.

With a presence in more than 140 countries, Ferre has developed a strong operational infrastructure that adapts to the technical, legal, and commercial requirements of different markets.

Our systems are designed to integrate seamlessly with certification, safety, documentation, and labeling processes.

Our strong and continuously evolving distributor network ensures stability, after sales continuity, and local market expertise. As a result, products are not only delivered, but supported throughout their lifecycle.

Brands working with Ferre gain access to markets that are already operationally and commercially structured.

Ferre simplifies technical variations and regulatory requirements, enabling partners to focus on building their brands.

By ensuring quality, manufacturability, and compliance, Ferre enables brands to grow globally with consistency, reliability, and long term sustainability.

7.8 million Units
Annual Capacity

Manufacturing Ecosystem & Scale

Scale matters only when it is consistent. In OEM/ODM, business partners do not look for capacity alone; they look for predictability: consistent quality, disciplined processes, and reliable delivery.

Ferre operates with 276,000 m² of production space, an annual capacity of 7.8 million units, and a workforce of more than 3,300 employees. This scale provides a strong infrastructure that supports the growth of its business partners.

Our manufacturing ecosystem is designed end to end. The balance between automation and skilled craftsmanship is reinforced by testing and quality control processes.

This approach turns manufacturing into trust.

Quality Testing & Compliance Mindset

Quality is not just a claim; it is a discipline practiced every day.

At Ferre, quality starts before production, shaped by engineering, material, and process decisions, and continues through testing and in-process controls. The goal is not only to detect issues, but to prevent them at the source.

This approach ensures reliable, predictable, and sustainable products. It also supports compliance across different markets, enabling smooth and repeatable OEM/ODM operations.

Redefining the Heart of the Home Innovation Built to Last

1978
Cooking appliances factory was established in Kayseri

1997
Expanded abroad

2015
Ferre new hob factory was established in Istanbul

2017
R&D Center was certified in Istanbul

2019
New hoods factory was established

2022
New built-in oven factory was established

2022
New mini oven factory was established

Monoblock Cavity

The Art of Perfect Heat
Seamless. Balanced. Exceptional.

Seamless Hygiene
Continuous seam welding eliminates gaps and corners where residue can collect, creating a refined and hygienic interior environment.
Energy with Intelligence
Advanced insulation and thermal optimization deliver A+ efficiency while maintaining uncompromise cooking precision.
Inspired by Tradition
Rooted in classic oven geometry, perfected through modern engineering where heritage meets innovation.

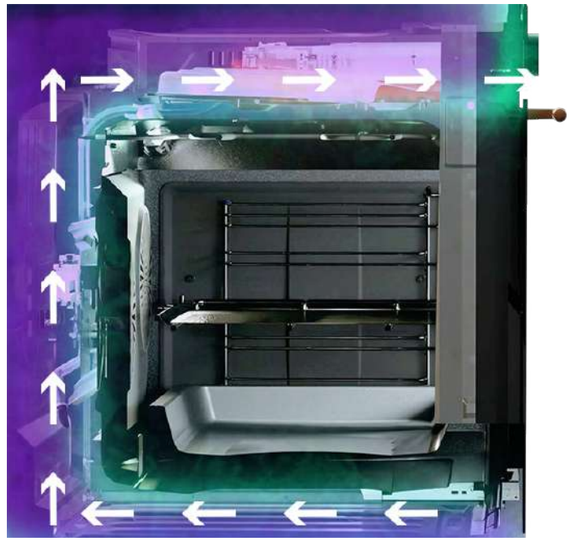

Special Enamel Coating

Precision in Every Layer
Where Technology Meets Perfection

Six Axis Robotic Enamel Application
Electrostatic powder enamel is applied with robotic precision, ensuring uniform thickness across every surface, edge, and corner.
Flawless Smooth Interior
The perfectly coated surface enhances both durability and aesthetic refinement.
Effortless Maintenance
Its non-porous structure resists grease and residue, allowing easy cleaning and long lasting hygiene.

60 cm BUILT-IN OVENS Highlights

Strong Cooling System

Controlled Power
Performance Without Compromise

Advanced Thermal Management
The optimized cooling system protects surrounding cabinetry while maintaining safe exterior temperatures.
Stable Interior Climate
Internal heat balance remains undisturbed, preserving cooking consistency and energy efficiency.
Safety in Every Detail
Designed to perform powerfully engineered to protect.

High Strength Construction

Strength You Can Feel
Precision You Can Trust

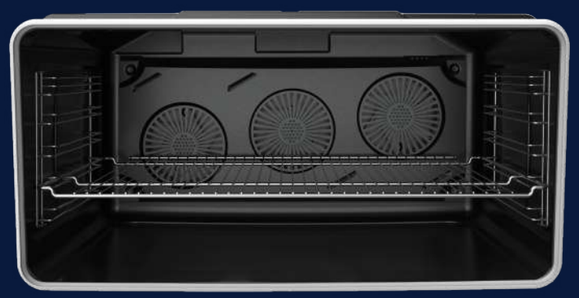

Reinforced Body Architecture
Built to withstand thermal expansion and mechanical stress without distortion
Precision Door Alignment
A rigid door system supported by 6 controlled assembly points ensures perfect sealing and flawless alignment.
Automation Driven Craftsmanship
Advanced production technologies ensure consistent excellence in every product.

Monoblock Cavity with Huge Capacity

The Art of Perfect Heat Seamless.
Balanced. Exceptional.

One-Piece Monoblock Architecture
Crafted from a single, unified structure, the cavity forms the solid heart of the oven stronger, cleaner, and built for enduring performance.
Fluid Heat Circulation
Optimized airflow surrounds every dish with evenly distributed heat, ensuring homogeneous cooking on every level

Triple Fans & Triple Ring Heaters

Delivers Heat from Every Angle
Where Airflow Meets Perfection

Three-Fan Circulation
Ensures even heat distribution on every level.
Triple Ring Heating
Delivers balanced, multi-directional heat with no hot spots.
Perfectly Even Results
Consistent airflow guarantees flawless cooking every time.

90 cm BUILT-IN OVENS Highlights

Dual Cooling System

Dual Cooling System
Two-Fan Precision Cooling
Performance Without Compromise
Twin Fan Airflow Control
Dual cooling fans work together to efficiently manage external heat across the 90 cm oven surface.
Enhanced Cabinet Protection
Maintains safe temperatures around the oven, helping protect surrounding kitchen furniture.
Reliable Thermal Balance
Ensures stable operation even during intensive cooking, with controlled and consistent exterior cooling.

Professional Quality Rotisserie

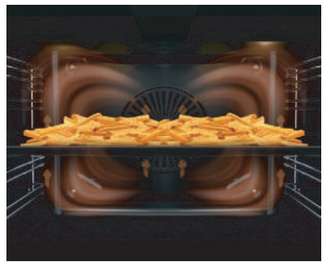

Master Rotating Perfection
Where Capacity Meets Precision

Triple Chicken Capacity
Easily roast up to three chickens at the same time with optimal spacing and balance.
Even 360° Rotation
Continuous rotation ensures uniform browning and juicy, tender results on every side.
Consistent Professional Results
Delivers perfectly roasted meats with crisp exteriors and succulent interiors every time.

FRYAIR

94% Less Oil
Cook your favorite dishes in a healthier way with up to 94% less oil. Experience perfectly cooked meals that are lighter, more nutritious, and just as delicious.

Airy Crunch
By evenly circulating hot air inside the oven, it cooks food thoroughly from all sides while reducing the need for oil so you can enjoy lighter, crispier, and perfectly cooked meals.

Perforated Tray
Thanks to its specially perforated tray, hot air circulates evenly around the food for a homogeneous cooking. This ensures perfectly consistent results every time crispy on the outside, deliciously soft on the inside.

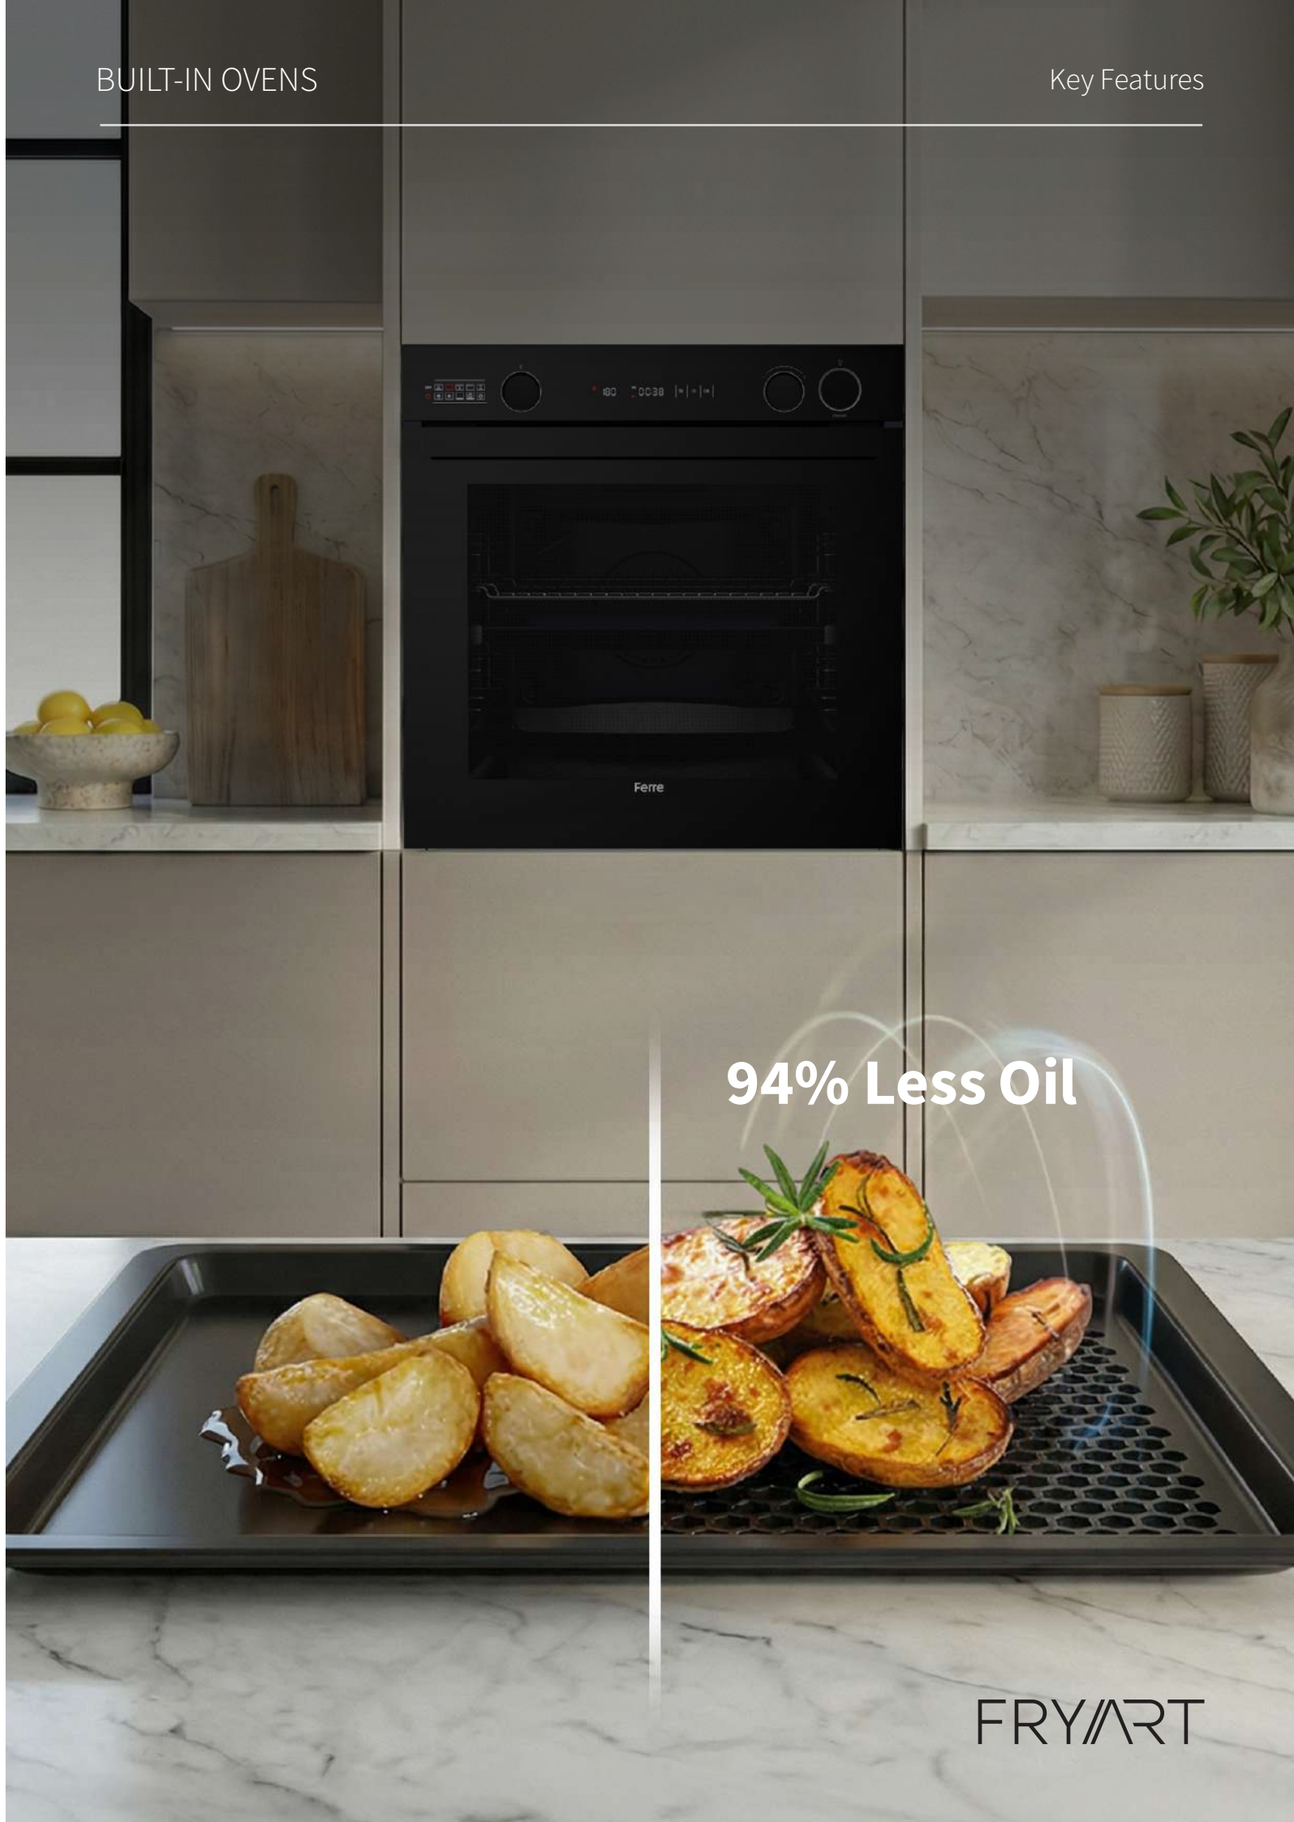

Accelerated Hot Air
Whether you're frying, baking, grilling, oven roasting or simply reheating, it adapts effortlessly to your cooking needs. Enjoy perfectly prepared meals every time, exactly the way you like them, whenever you choose to cook.

*Compared with classical deep frying technique.

BUILT-IN OVENS

Key Features

STEAMART

Up to 30% More Fluffy

Steam/Art feature, dough rises **up to 30%** more fluffy producing pastries and breads that are perfectly airy and soft on the inside, while developing a golden, satisfyingly crisp crust on the outside.

STEAMART

Steam Assisted Cooking

The power of steam, combined with traditional heat, transforms your cooking experience locking in flavors, enhancing textures, and ensuring every dish is perfectly cooked.

Perfect Cooking Results

Enjoy meats that are juicy and golden, breads that rise beautifully, and pastries that are soft on the inside and irresistibly crispy on the outside, every single time.

Hydro Clean

Hydrolytic cleaning with steam gently softens food residues while taking care of all interior surfaces. This makes maintenance effortless, allowing you to remove grease and spills with a simple wipe, keeping your oven clean and well-maintained after every use.

Patented Design

A specially engineered water injection system with a magnetic, removable design for effortless refilling, combined with a durable stainless steel, leak-proof tank strategically positioned near the ring heater for rapid and efficient vaporization.

BUILT-IN OVENS

Key Features

Up to **30%** More Fluffy

STEAMART

PYROART

450°C Extreme Temperature
Crafted with a unique material and an exclusive blue coated interior, this oven is engineered for exceptional resistance to extreme temperatures. Its advanced surface technology enables effortless, chemical-free cleaning, maintaining a flawless interior with minimal effort.

Safety Lock
Designed with intelligent safety engineering, the oven automatically locks its door during the pyrolytic cycle.

Triple Cooling System
It is equipped with advanced insulation and triple cooling system, ensuring optimal performance.

4-Layer Glass
Quadruple glass ensures the outer surface remains at room temperature, providing a safe and secure touch surface

BUILT-IN OVENS

Key Features

Effortless and
Ecological Cleaning

PYROART

PIZZART

300°C
Reaching up to 300°C with homogeneous heat distribution, every pizza, pide or lahmacun comes out with restaurant quality results.

Bamboo Pizza Peel
Special bamboo pizza peel designed for greater durability, improved heat resistance, and effortless pizza handling. Its sturdy structure helps support the pizza securely while transferring it with ease.

Restaurant Quality in 3-4 min
Special 300°C heat setting delivers perfectly baked, restaurant quality pizzas in only 3–4 minutes.

Special Pizza Stone
The extra thick pizza stone can be added to further enhance baking performance and help achieve more even, consistent results for perfectly baked pizzas.

*Ring Heater (2000W) + Bottom Heater (1200W)

LAMP
It helps to illuminate the inside of the oven. When you switch it to the oven illumination position, the heaters and the fan do not operate. The light will remain on as long as the oven operates.

DEFROST
The fan circulates the air around the meal and defrost the frozen food such as meat, bread and cake.

BOTTOM HEATER
Only Lower heating is turned on. If the bottom of the meal, which is being cooked, needs to be fried, use the programme towards the end of the cooking.
Also use this function for Steam Cleaning.

TOP&BOTTOM HEATER
The food are heated in the same way downwards and upwards. Upper and Lower heating are turned on. It is convenient for the food such as cakes, pastries.

TOP HEATER
Only Upper heating is turned on. If the top of the meal,which is being cooked, needs to be fried, use the programme towards the end of the cooking.

TOP&BOTTOM with FAN
Lower + Upper Heating and Fan are turned on. It is convenient for the food such as meat, cakes, biscuits. By the help of fan, the air circulation is performed in a controlled way and evenly within the oven.

TOP HEATER with FAN
Upper heating and fan are turned on. You can cook your food, which require to be cooked for a long time, by saving energy. Its cooking duration is longer than other functions. It is not recommended for leavened food. “This mode is the highest mode for energy efficiency.”

HIGH GRILL HEATER
It is convenient for grilling and frying big and medium portion meals.
It heats the whole area under the heater.

FUNCTION OPTIONS Symbol&Descriptions

FLOW ART
The grill and fan operates together. The fan distributes the hot air evenly. It is convenient for cooking large sized meat dishes.

LOW GRILL HEATER with FAN
Small grill and fan are turned on. You can cook your food, which require to be cooked for a long time, by saving energy. Its cooking duration is longer than other functions. It is not recommended for leavened food.
This mode is the highest mode for energy efficiency.

LOW GRILL HEATER
The food are heated in the same way downwards and upwards.
Upper and Lower heating are turned on. It is convenient for the food such as cakes, pastries.

TURBO&BOTTOM HEATER with FAN
Turbo fan and lower heating are turned on. It is convenient for cooking pizza.

TURBO HEATER with FAN
Turbo heater shall step in and cook your meal evenly with hot air by the help of fan.

3D FUNCTION
Bottom + top and turbo fan are on. Cooks evenly and quickly. Suitable for cooking large-scale foodstuffs such as turkey, goose, duck, and casserole etc

LARGE GRILL
Suitable for grilling large and medium cuts of meat, and browning sliced bread.
The entire area under the heating element is heated.

GRILL WITH TURBO FAN
The grill and turbo fan are on. The fan distributes the hot air evenly. Suitable for large cuts of meat, hamburger patties, and salmon fillets, etc

FINER COOKTOP

Our gas hobs with their slimmer metal cooktop design add a visual value to your kitchen. And the tempered glass plate design makes you feel the strength and durability.

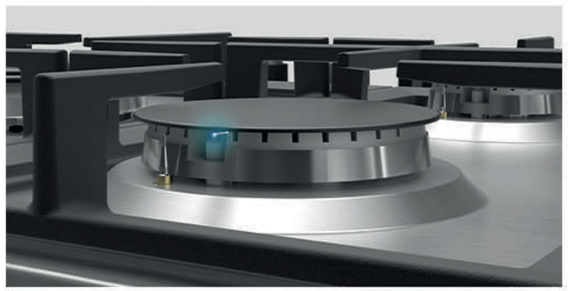

HIGH POWER WOK

Dual-ring wok burners deliver a perfect boost in power and you can achieve the high temperatures quickly.

WOK ADAPTER

To maximize the functionality of our gas hobs, we offer a useful wok adapter as an accessory which provides extra stability for all kinds of round-based woks or pans.

AUTOMATIC IGNITION

Lighting the gas burner is quite easy. Gently press the knob down and rotate it to the level that you desire.

ENLARGED COOKING AREA

The gas collection provides a very comfortable cooking even for the largest pans, thanks to the extended distance between the burners by their specific designs.

SEAMLESS ADAPTATION

Our new collection has been designed precisely to ensure a seamless view for cooktops and easy cleaning facilities. Simply lift the pan supports then wipe off the single refined metal cooktop as practical as the glass one.

CONTINUOUS PAN SUPPORTS

Enable ergonomic and firm cooking area for both glass and metal cooktops. Flat design allows easy sliding of big pots smoothly. Available as cast iron and plain steel.

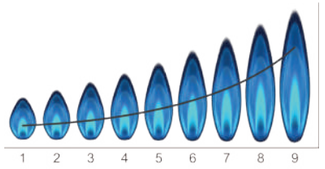

EASY TO CLEAN

Stainless steel hobs with special brushing enable less scratches and less fingerprints. Ultra-smooth enameled metal surface results in easy and comfortable cleaning. As to the tempered glass cooktop, a shiny appearance is always guaranteed attractively.

FLAMEART

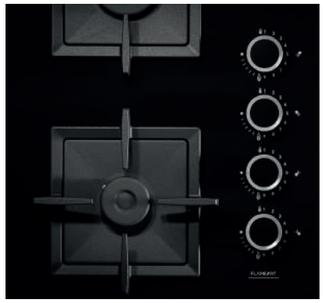

FlameArt Step Control
FlameArt technology introduces a step based flame control system with 9 distinct levels.
Instead of estimating heat as “low” or “high,” you can now cook with clearly defined settings.
It can be applied across a wide range of hob sizes, from 30 cm to 90 cm.

9-Level Flame Adjustment
Easily choose from 9 flame levels to match your cooking needs.
From low heat to high heat, each level delivers controlled and consistent results.

Step Based Control
With step-based flame adjustment, you can manage the cooking process with greater precision. With FlameArt, you can cook at a specific level such as 3, 7, or 9 and achieve consistent, repeatable results every time.

Instant Response
FlameArt technology responds instantly to every adjustment, delivering seamless and fluid performance. With fast and accurate reaction to every touch, it helps you stay in control throughout the entire cooking process.

BUILT-IN HOBS

Key Features

BASIC

Basic models have been formed to fulfill the market needs and expectations. With a wide variety of pan support designs, we differentiated our models to draw every customers' attention all around the world.

30-60-65-70-75-90 cm

EDGE

The sharp-edged pan support design combines an ergonomic and enlarged cooking surface. These hobs are created for stylish kitchens and for the users who have a high-level point of view.

65-75-90 cm

ARC

Arc gas hobs are designed to achieve maximum ergonomy level for the users with the burner configuration and the enlarged cooking area. Shape of the pan supports adds a dynamism to the kitchens.

65-75-90 cm

CURVED

These hobs bring a unique appearance with their curved pan supports. This smart feature not only helps to improve the flame quality but also provides a larger pan area for the high power burners.

60-70-90 cm

BUILT-IN HOBS | GAS HOBS Series

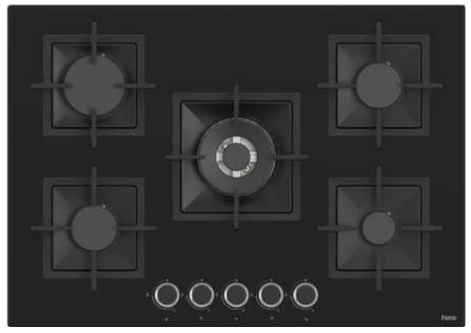

ELITE

Elite design is the result of a perfect combination of functional and minimalist approaches. With the simplicity of its style, this line can be adapted to any kitchen.

60-70-90 cm

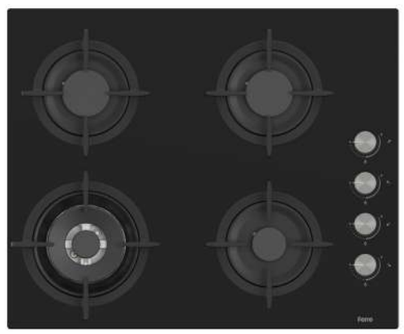

SQUARE

Experience modern design with this square glass hob, featuring sleek pan supports and a durable build. It combines practicality with a refined, contemporary look perfect for enhancing any kitchen.

30-60-75-90 cm

ROUND

These hobs represent simplicity and ease of use. Thanks to the round and individual pan support for each burner, the user experience is taken to a much different level.

30-60-75-90 cm

MODULAR

Modular gas hobs are created for elegant needs and designed to organise the ideal cooking area which guarantees an excellent performance.

60-70-90 cm

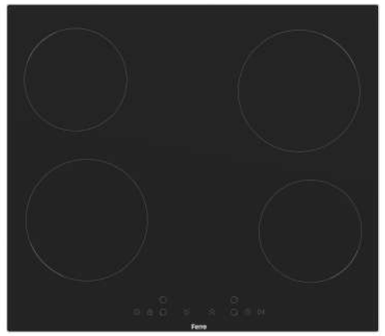

INDUCTION

Ferre Induction hobs provide a remarkable energy saving along with accelerated cooking. You can even boost your cooking from simmer to boiling in seconds.

60 cm

VITROCERAMIC

With the perfect cooking surface and dial touch control, Ferre vitroceramic hobs make the cooking and cleaning easy.

30-60-70-90 cm

Plug and Cook
Ferre vitroceramic & induction hobs can be plugged directly into the standard socket without requiring a hardwired connection. You can just plug and start cooking.

Pause and Cook
With the ‘‘Pause and Cook’’ button, you can temporarily stop the cooking when necessary then resume the previous settings easily. In case of spills for example this function works practically.

Child Lock
This touch button activates a temporary safety lock for children and also prevents accidental usages during cleaning.

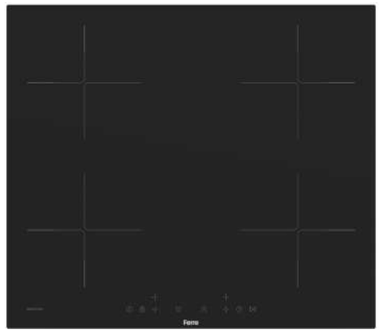

Zone-Selective Timer
This function enables to set the cooking zone and its duration individually.

INDUCTION & VITROCERAMIC HOBS

Key Features

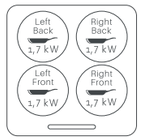

60 *Front Control Hobs*

PL 061

Features

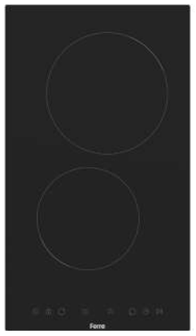

- Easy to clean smooth surface
- 9 power levels

SILENTART

Quiet Power
Advanced BLDC motor technology combines powerful performance with minimal noise.
The inverter motor ensures high efficiency and long-lasting durability, while adapting to operating conditions for balanced performance.

A++

A++ Energy Performance
A++ BLDC Motor Technology delivers superior extraction while minimizing energy consumption, instantly refreshing your kitchen.
Create an eco-conscious living space without compromising performance.

36 dB Ultra Silence
Operating at just 36 dB, advanced BLDC Motor Technology quickly and effectively purifies the air in your kitchen. It delivers powerful performance while maintaining silence, ensuring a comfortable user experience.

120°C Thermal Protection

Advanced Protection & StablePerformance
Advanced BLDC motor technology delivers stable performance with intelligent electronic protection. After 6 hours of continuous operation, the system activates protection mode and safely shuts down. It is also compatible with different voltage and frequency standards.
